Addressing skills mismatching in the green sector through Digital Upskilling of VET

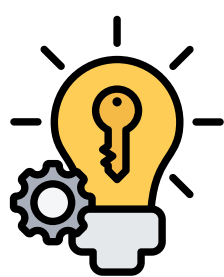

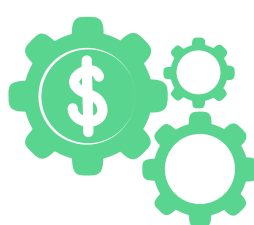

CIRCULAR ECONOMY

A Future That Doesn't Go to Waste

WHAT IS CIRCULAR ECONOMY?

The circular economy is about using resources wisely – reducing waste and keeping products in use longer.

KEY PRINCIPLES:

Design for reuse, extend product life, reduce resources, recycle, and minimize waste.

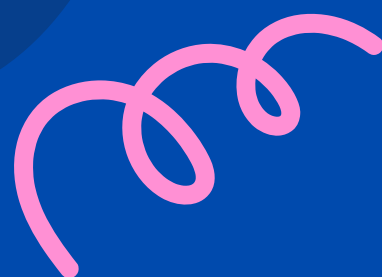

WHY DOES IT MATTER?

This approach leads to less waste, conserved resources, more green jobs, and a healthier, sustainable future.

HOW CAN YOU HELP?

Buy durable products, repair instead of discarding, share and donate, recycle correctly, and support sustainable local brands.
